

The audit trail

INTELLIGENT NETWORKED SECURITY

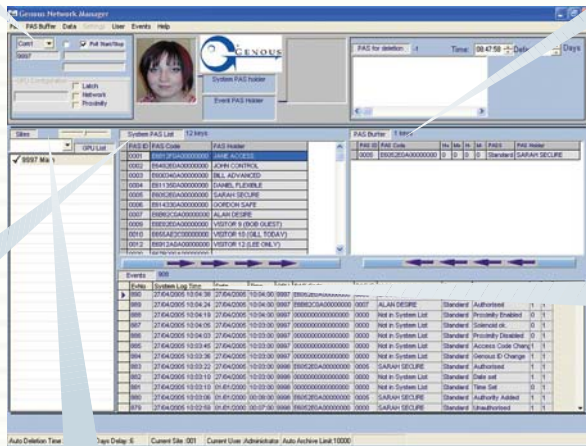

Genous NET Manager
Displays live events, key holders, door status etc. Provides access to all Genous NET administration and monitoring screens by point and click or pull down menus

GPU administration
Create and update door/lock database, including individual location, type etc.

Keyholder administration
Create and update keyholder database including photo ID and individual information.

PAS editor
Create user profiles before adding to selected doors/locks for accessibility and role.

Event log analyser
Extract all events that fit one or more parameters (keyholder, date range, door etc.) to provide specific report.

Group administration
Create user or lock groups, enables single instruction to multiple similar-role identities.

Reporting
Event log analysis provides concise, focused reporting at the touch of a button.

INTELLIGENT STAND-ALONE SECURITY

Portable administrator

GPU administration, data collection and event log inspection.

Handheld administrator

GPU administration and data collection.

Quality Statement - Implementing our quality management system and accreditation throughout the group ensures that design and testing are included within our quality procedures. This provides a consistently high quality of product and service to the customer.
