

Access Control with a difference

Do you really want to:

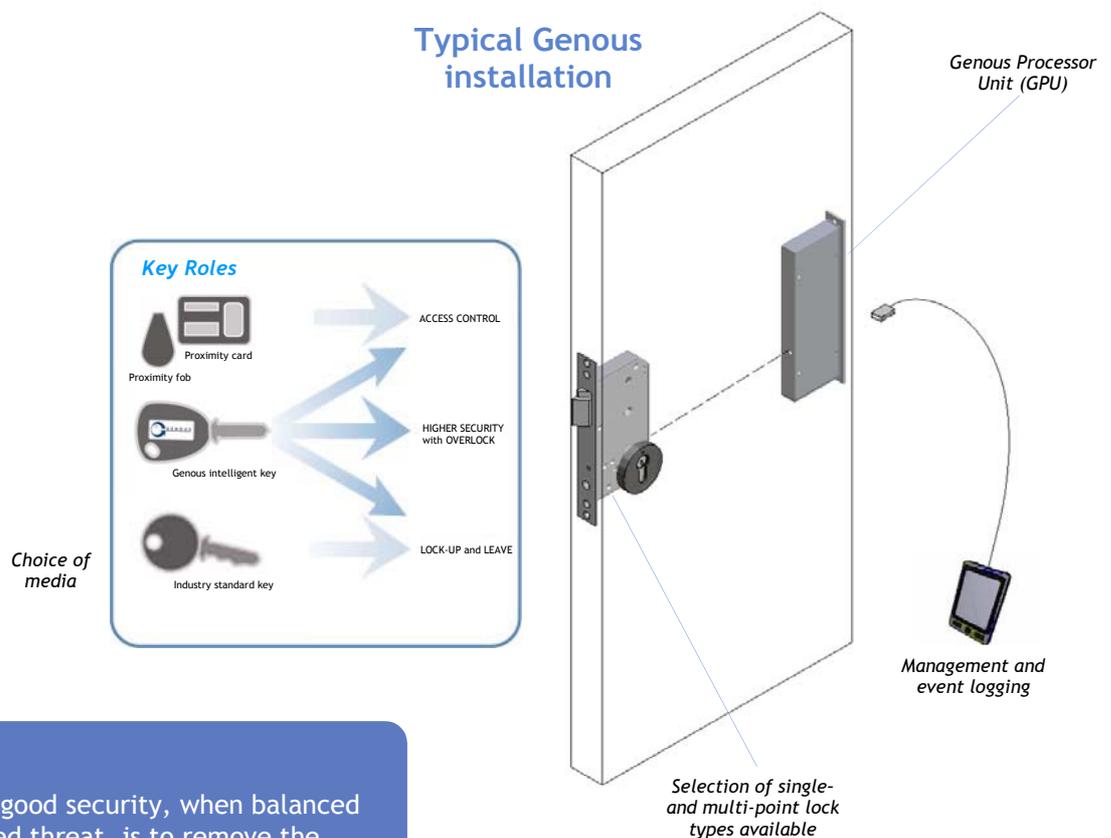

- give authorised entry?
- bar unauthorised entry?
- know who was there and when?
- protect your assets - people and property?

If so, then Genous provides the solution!

GENOUS

Genous provides the combined solution of high-level electronic intelligence with the choice of key cylinders and locking mechanisms from leading manufacturers. Designed for both physical and surreptitious attack.

The intelligent key system includes an overlock that prevents lock operation by unauthorised keys, even if the key is mechanically suited to the lock

Comfort Zone

The objective of good security, when balanced with the perceived threat, is to remove the criminals comfort zone; raising their profile and increasing the chances of them being caught.
